

## PURPOSE

What is the biggest purpose behind your idea?  
(a highly aspirational tagline that tries to solve a global challenge)

The aim of GreenTech is to take a step for making a better future to the world. Even it is a small and virtually step but it can be real one day.

GreenTech aims to solve environmental problems by creating new ways to generate electricity without hurting the environment

## SOCIAL IMPACT

What positive impact does your idea have on society?

GreenTech website will spread the awareness about the environmental problems and the ways to solve them.

GreenTech website will also allow people to send their questions and they will be answered in FAQ.

## ENVIRONMENTAL IMPACT

What positive impact does your idea have on the environment?

The technology used in GreenTech village will be operated by renewable energy which won't hurt the environment.

Inversely from the world energy consumption from fossil fuels, GreenTech will help the environment to recover from this and will encourage people to depend on renewable sources of energy.

## PEOPLE

Who will benefit from your idea?

Firstly, People who live in the village, and secondly it will benefit many people in the world if the idea was applied in different places.

## MOONSHOT

Describe your idea in 3 sentences!

GreenTech is an echo-village, people who live in it will practice their normal life and activities. People will collaborate together looking forward to not hurting the environment even they will use modern technology. In GreenTech we aim to solve environmental problems specially consumption of energy.

## BREAKTHROUGH TECHNOLOGY

Which technologies help you realize your idea?

Until now the used technology in GreenTech is mobile phones, computers, websites and prototype. But when the idea is applied modern and huge technology will be used to build smart houses and machines.

## FINANCIAL IMPACT

How do you make sure your idea is financially sustainable?

GreenTech will offer crops with small fee to people who live in it, and it will income from selling crops outside the village. The website of GreenTech will be free and available to everyone.
