vedad.altic@gmail.com

-Sophie Lindemann: PR manager from Germany
MarieSophieLindemann@gmx.de

-Laksh Saini: Website/app manager from India
Lakshsaini29@gmail.com

With our diverse team from different parts of the globe, we can surely solve a global problem. We can solve global hunger.

The SDG's we are working on:

The main SDGs we are solving trying to solve is end hunger, achieve food security and improved nutrition and promote sustainable agriculture, the shocking reality is that healthy food is expensive and people see eating as this complex task, we will offer recipes that are nutritional and ensure that the people we service will be able to offer the ingredients for those recipes we send them to.

The premium option offers a virtual assistant, with the virtual assistant we aim to employ the youth only, as the tasks are not complex and in that way we are able to reduce youth unemployment and deal with the SDG of goal 1; end poverty in all its forms everywhere.

SDG goal 3 ensure healthy lives and promote well-being for all at all ages: by offering nutritional recipes, people can lead healthier lives. What we eat impacts our bodies more than we know it. Our bodies require us to function at our maximum ability and get the right food will lead to healthier citizens and productive citizens which leads to a better economy.

Another SDG we will be tackling is goal 13-take urgent action to combat climate change and its impact : food waste is the third most carbon emitter, with our app we will be able to combat food waste and in that reduce the rate of climate change. While we are reducing that rate of climate change and also have to adapt to the change in climate so with the other NGOs and companies we hope to partner up with. They can offer funds and we can support each of our causes.

5 BEST COMPANIES WILLING TO DONATE TO FUNDRAISERS

1. ORIENTAL TRADING COMPANY

Recognized as one of the Top 50 Internet Retailers and one of the Top 50 Catalog Companies, the Oriental Trading Company supports nonprofits in the spheres of education, youth, healthcare, and human services — that should cover many bases!

2. GOOGLE DOT ORG

Google's charitable arm gives back to local, national, and global communities. Each year, this organization donates more than \$100 million in grants and over \$1 billion in products. Applicants can apply for seed funding for entrepreneurial projects in developing countries, along with community grants and disaster relief support. As it's Google, they also provide funds to help boost online traffic with what they call Google Ad Grants.

3. DISNEY

Another one of the best companies to ask for donations is Disney's Corporate Philanthropy Program. Committed to building stronger communities and social responsibility, Disney Programs provides grants geared towards children and families totaling over \$332 million a year. They support children around the world and also are known to donate books...at numbers in the millions. They have many of their own initiatives but also might be able to help with ours.

4. CVS

The CVS Health Foundation is a private foundation that awards grants for education, healthcare, and local community involvement efforts. These non-profit grants are available by invitation only so it might be best to reach out to understand how we might get an invitation. Otherwise, CVS Health provides strategic investments to nonprofit partners across the U.S. from projects that strive to increase access to healthcare for underserved populations to youth prevention programming.

5. STARBUCKS

Starbucks' Corporate Philanthropy Program has been alive and thriving for some years now. Founded in 1997, the Starbucks Foundation has given millions of USDs in the form of grants to nonprofits. But not only that! Whether a project involves community service, opportunities for youth, or college achievement, this coffee company might be able to help.

Our next steps

For the month of July

- create our website
- create content for our socials
- create the app

For the month of August

- start beta testing with 5 different groups of people
 1. College student
 2. Single household (someone who lives alone)
 3. A couple
 4. A medium family
 5. A large family

For the month of September

Reflect and adjust where necessary for 2 weeks

Launch the app to the rest of the public
