# MedNet

The future of innovation in Healthcare

Mission

We are here to revolutionize the way healthcare achieves innovation

Vision

We believe our mission can be achieved by utilizing the Internet to create a professional social network of medical researchers, doctors and patients

The INTERNET

GREATEST DATA REPOSITORY

- The Internet has incredible amount of users, who in turn hold incredible amount of data which can be used in Need-led innovation

NO NETWORK DESIGNED TO BRING INNOVATION AND CONNECT RESEARCHERS

- Enormous potential of the Internet in this regard is left underutilized or not utilized at all

Global NETWORK

- the outreach of the Internet is global in scope

What for?

Research
There is no innovation without research

Provide
Innovation is easier when you can brush up your skills by providing

Cooperation
Research is slow without cooperation

Start-up
Innovation is meaningless without releasing it to the market

Structure of the Platform

Main site

- Enjoy repository of new daring research papers (and memes) in medicine, when logged in join one of numerous chatrooms or video calls and talk with your peers about innovation, and when you have something in mind turn it into reality

Sign-up/log-in

- You can sign-up as a doctor, researcher or legal entity in healthcare, or as a patient
- Develop your dream innovation in healthcare by forming a team and enjoying the resources provided by the Platform

Project area

- Create and join innovation projects
- Enjoy resources ranging from winning investments to a premade software for business plan building, receive legal and scientific aid

Chat rooms for patients

- Patients can also chat with our researchers
- While they get real-time free instant help, researchers receive a valuable insight into what patients need

Sustainability goals

Need-led innovation

Sustainable business growth

Platform operates by providing great projects with all resources needed to bring that impact to life

Sustainable instant help to the patients

Instant contact between doctors and patients due to the social network style nature

1

2

3

4

Sustainable scientific growth

Instant evaluation of an idea by other scientists, capability to together brainstorm something brilliant every day

Easy to use and utilize

Simple social network – professional project developing software hybrid
