

PURPOSE

What is the biggest purpose behind your idea?  
(a highly aspirational tagline that tries to solve a global challenge)

The purpose of our project is to make democracy more accessible for students and provide practical exposure to how a functioning democracy works by bringing together a group of like-minded proactive individuals who are willing to work to make a change in their community.

SOCIAL  
IMPACT

What positive impact does your idea have on society?

- There'll be greater interest, awareness, and knowledge among the youth on topics like public policy and democracy and they'll also get a platform to communicate with like-minded individuals, and broaden their civic skills.
- The Local community will be happier as awareness about their problems would be spread and participants would try to tackle their issues.
- Adults will start taking teenagers seriously as they see them actively making a tangible impact on society.

ENVIRONMENTAL  
IMPACT

What positive impact does your idea have on the environment?

Students would discuss and solve problems, many of which would be related to the ecology and environment of their surroundings. In this way, our project helps the betterment of environment and local community overall

PEOPLE

Who will benefit from your idea?

Students, local community, and society overall

MOONSHOT

Describe your idea in 3 sentences!

- A way for Gen-Z to directly engage in democracy and solve local problems in their community through emulation of a government. We plan to implement monthly programs where participants discuss regional problems, debate and come up with a unique solution through the codes and conduct of an actual government and with the allocated funds ,they implement that solution.
- At the same time, we will also educate them and guide them through the entire process, deepening both their understanding and appreciation for the democratic process.
- For an analogy, it is similar to Model United Nations but a month-long, but instead of discussing world issues, participants take up local problems and instead of just discussing the issues, participants actually make a tangible difference in the end

BREAKTHROUGH TECHNOLOGY

Which technologies help you realize your idea?

Because we plan on conducting this offline, we would not need revolutionary technology to achieve our goals but would rather use basic but powerful tools to do so.

FINANCIAL  
IMPACT

How do you make sure your idea is financially sustainable?

- We feel that this program should be initially free so as to not restrict anyone to apply
- We are hoping to secure funding from various organizations to cover the expenses for the first 2-3 cohorts and will simultaneously explore other financial models including charging participants a small fee so that the project is self-sustainable in the long run.
