

PURPOSE

What is the biggest purpose behind your idea?
(a highly aspirational tagline that tries to solve a global challenge)

We want to make Scientific Research lovable,
accessible, and possible for high school and
undergraduate students.

SOCIAL IMPACT

What positive impact does
your idea have on society?

Falcon Academy of
Sciences is slowly becoming
the center of Science,
Technology, Research, and
Innovation enthusiasts of
Bangladesh. It has the
potential of improving the
intellectual community and
turning them into highly
productive scientists. Our high
school & undergraduate
students will be academically
more edged than ever.

ENVIRONMENTAL IMPACT

What positive impact does
your idea have on the
environment?

Our biology faculty is filled
with amazing environment
scientist like Dr Amin and Dr
Abiar (Professors of
Bangladesh Agriculture
University) and the biology
faculty will be highly delved
into researching about
oceans, forests, and
microparticles. We would like
to lessen the current
pollutions through our
innovations.

PEOPLE

Who will benefit
from your idea?

Within short time, High school and
Undergraduate students, and within
long time, Bangladesh's scientific
research community's member will be
benefitted from our idea.

MOONSHOT

Describe your idea in 3 sentences!

Team Falcon is aiming to build the
first-time-ever research platform,
especially designed for the youths, which
aims to develop a community with student
researchers to ensure bringing knowledge
and skills to solve problems, making sense
of information, and gathering and
evaluating evidence to make decisions. In
order to meet this gap, Team Falcon
provides opportunities to students to
conduct research on their desired topic
under the guidance and supervision of
renowned professors home and abroad
with full Laboratory access. We are working
as an connecting medium for both
students and professors.

BREAKTHROUGH TECHNOLOGY

Which technologies help you realize your idea?

Cloud Computing was our source of inspiration for making research accessible
to everyone. We have to make it affordable being a third world country, and we
have divided our whole work process into shorter chunks. On the top of that,
new rise of EdTech and Learning apps made us realize how potential current
students are.

FINANCIAL IMPACT

How do you make sure your
idea is financially sustainable?

We will charge a little from our
customers, gather the government
research funds, use cloud ideas to
lessen our costs, and look up for
educational grants to become
economically sustainable.
