# Say Hello to MEDICREEN.

MEDICREEN

Our Mission and Goals

An overview of what we're working towards.

THIS IS OUR MISSION.

Diagnostics and Self Assessment:
The healthcare sector needs to tackle one of its major problems: incorrect or overdue diagnosis. When a patient wants to get a consultation, there are long queues at hospitals to see a professional. We'll streamline patient flows by doing everything from asking patients preliminary questions (Diagnostics) and generating a report such that it could be sent to a doctor for drug prescription.

THIS IS OUR MISSION.

Identify Health Facilities:
Using map technologies, we solve the problem of people not knowing where the closes health facility (Hospitals, Pharmacies, etc.) around them are.

Because accessibility and technology in healthcare are necessary now more than ever.

HOW DO WE DO THIS?

–We'll build an AI Chatbot to performing a self–assessment/diagnostic report by giving the user a set of questions to answer.

– We'll integrate Google Maps API to find closes health facilities around a user at a point in time.

SOLUTION STATEMENT

When the project is complete, users will be able to

Perform self-assessment reports from the comfort of their homes.

Send reports to doctors/pharmacists for drug prescription.

- Get the closest health facilities wherever they are. Even if they are new to the location.

OUR FUTURE INTEGRATION

1

Add a Wellbeing Page

2

Donation Page;

3

Integrate a healthcare Organizations

Time to change health care.

App Features.

Chatbot walkthrough.

Diagnosis Report.
